

# Skagerak Coronavirus, Sickness routines

## When shall students, guardians and staff come to school?

Students and staff must attend school if they have no symptoms of illness.

- In case of respiratory infection, children and staff may return after being symptom-free.
- If a person in the household has symptoms of respiratory infection, but not confirmed covid-19, the student/staff member shall attend school/SFO as normal. However, these should go home from school/SFO if they experience symptoms (see below).
- Students and staff with typical symptoms of pollen allergy (known pollen allergy, runny nose with clear nasal secretion, runny /itchy eyes) attend school / SFO.
- Many younger children often have a runny nose without other symptoms of respiratory infection, especially after they have been outside. **These children can come to school / SFO if the child does not have a fever and is otherwise healthy.**

Parents who are healthy and have no symptoms of respiratory infection can follow and pick up their children at school / SFO at the school gate.

SICKNESS  
ROUTINES-  
'COMING IN'

## When shall students and staff not attend school/SFO?

Students and staff with respiratory symptoms:

- Students and staff should not attend school/SFO with mild respiratory symptoms, coupled with a fever or other illness. They should stay at home until they are free of these symptoms.

Students or staff who have confirmed covid-19:

- Must be in isolation. **It is the health service** that decides who should be in isolation and for how long, in accordance with advice from the Norwegian Institute of Public Health (see [www.fhi.no](http://www.fhi.no)). Guidelines for regulations are given by the Directorate of Health.

Students or staff who have been in close contact or share households with a person with confirmed covid-19:

- Must be in quarantine. **It is the health service** that decides who should be in quarantine and for how long, in accordance with advice given by the Norwegian Institute of Public Health (see [www.fhi.no](http://www.fhi.no)). Guidelines for regulations are given by the Directorate of Health.

Guardians who have respiratory symptoms, are in quarantine or are in isolation:

- Shall not come to school/SFO and must find other solutions for bringing their children to and from school/SFO.

SICKNESS  
ROUTINES-  
'STAYING HOME'

## **When illness occurs at school/SFO**

It is important that students/staff who have symptoms of respiratory infection go home (after parents have been alerted) or picked up as soon as possible. Sick students or staff should not take public transport. Students being picked up must wait in the nurse's office with an employee or outside where there are no other children. If possible, the employee should stay two meters away, but a balance must be made in relation to the student's age and need for care. If it is not possible to keep two meters distance and the student is comfortable to do so, the student should wear a facemask to reduce the spread of infection to others. If the student does not want to wear a facemask, the adult should put on a facemask if two meters distance cannot be maintained. If the toilet is needed, this should not be used by others until it has been cleaned. The staff member looking after the student must wash their hands after being with the student. Afterwards, rooms, toilets and other areas where the student has been must be cleaned with ordinary cleaning products.

## **What if someone in the household of a student/staff is ill?**

If a person in the household of a student/staff member has symptoms of respiratory infection, but has not confirmed covid-19, the student/staff member should attend school as normal. Similarly, the student can attend SFO. However, the student/staff member must go home from school/SFO if they experience symptoms, as mentioned in the section above.

**If a covid-19 case has been confirmed in the household, all close contacts shall be quarantined in accordance with the advice and direction of the health authorities. No quarantined person can attend school or SFO.**

**SICKNESS  
ROUTINES-  
WHEN SOMEONE GETS  
SICK AT SCHOOL**

## Covid-19 Testing Procedures

- Staff can request a test individually.

## Internal Communication and GDPR

- We will communicate internally as a staff. Anything outside of staff and students is the responsibility of the health authorities

## Tracking

- when confronted with an internal diagnosis, Gitte will be our tracker and work with health authorities referenced

## Cleaning

- has been moved to daytime hours with checklists

## Movement of Students

- Currently in individual staircases, entrances, toilets

## Parents

- Stopped at gate front gate for all campus buildings

## Digital Learning

- those with medical certification will be but on individual platforms with follow up form coordinators

SICKNESS  
ROUTINES-  
INTERNAL

## ● **Barn og ansatte kan møte i barnehagen dersom:**

- Selv om en hjemme i husstanden har luftveisinfeksjon, men ikke bekreftet Covid-19
- De har typiske symptomer på pollenallergi (dvs om de har kjent allergi, har rennende nese med klart sekret eller rennende/kløende øyne)
- Ved gjennomgått luftveisinfeksjon kan barn komme tilbake når de har god allmenntilstand. De kan ha litt restsymptomer som rennende nese og sporadisk hoste.
- De har rennende nese uten andre symptomer på luftveisinfeksjon (hoste, sår hals, tung pust, feber, nedsatt allmenntilstand) hvis de ellers framstår som friske.

- **Barn, foresatte og ansatte som ikke skal møte i barnehagen:**
  - **Barn og ansatte** skal selv med milde nyoppståtte luftveissymptomer og sykdomsfølelse ikke møte i barnehagen. Ansatte skal være hjemme til de er symptomfrie. Barn kan komme når de har fått god allmenntilstand. Barn med lette symptomer med rennende nese som eneste symptom behøver ikke holdes hjemme eller testes.
  - **Barn eller ansatte** som er nærkontakter til en person med bekreftet covid-19 skal være i karantene
  - **Foresatte** som har luftveissymptomer, er i karantene eller isolasjon skal ikke følge eller hente barn. De må finne andre løsninger for dette.

# HVA OM NOEN BLIR SYKE MENS DE ER I BARNEHAGEN?

- **Barn** som får symptomer på luftveisinfeksjon skal hentes. De skal vente på et eget rom eller ute sammen med en ansatt. Avhengig av alder og barnets behov skal den ansatte holde 1-2 meters avstand.
- Etter at barnet er hentet vasker den ansatte hendene sine, og rom, toalett og andre områder der barnet har vært skal vaskes med vanlige rengjøringsmidler.
- **Ansatte** som blir syke skal gå hjem så raskt som mulig
- Hvis en ansatt eller et barn får påvist covid-19 vil helsetjenesten ha ansvar for å følge opp med nærkontaktvurderinger og andre tiltak
